DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what is meant by limitation of "cam grooves extending with slanting" as regards structure of the disclosed embodiment of the invention as it is covered by that claim language. For the purposes of examination, the limitation has been treated as requiring cam action arrangement but clarification is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which

Art Unit: 3676

said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 1,865,205 to Palmquist in view of U.S. Pat. No. 6,120,069 to Taranto.

Palmquist '205 teaches Applicant's claim limitations including : a "swing member" - 12, a "pair of lock arms" - 11a, 11a, each includes the "hook portion at a tip end thereof" - portions 13 are bent back over to overhang inherently forming a 'hook' where it's noted that Applicant's disclosed "hook" does not hook around any keeper or other structure, a "subassembly member for bringing the lock arms close to each other" - 36, "cam grooves" - 35, "cam pins" - 30. Palmquist '205 discloses the claimed invention except for its being "supported by a lid of a glove box". Taranto '069 teaches that it is well known to provide generally similar latches on glove boxes although that latch does not have specific structural features of the presently-claimed latch. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the glove box of Taranto '069 with a latch as taught by Palmquist '205 to compensate for tolerances and remain tightly closed as stated by Palmquist '205. One of ordinary skill in the art would have more than a reasonable expectation of success since such use would not otherwise affect the structure of the latch.

Allowable Subject Matter

6. Claims 2, 3, and 7-19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 6,152,512 to Brown.

U.S. Pat. No. 5,688,000 to Dolman.

U.S. Pat. No. 6,672,632 to Speed.

U.S. Pat. No. 6,776,441 to Liu.
